Package Contents

The following item is included with your purchase of the SIRIUS FM Direct Adapter. Unpack it carefully and make sure that everything shown is present. If anything is missing or damaged, or if the device fails to operate properly, notify your dealer immediately. It is recommended that you retain the original carton and packing materials in case you need to ship your FM Direct Adapter in the future.

FM Direct Adapter

Getting Started

The FM Direct Adapter directly connects the FM signal from your SIRIUS radio to your vehicle's AM/FM radio, reducing any interference which might be present from FM radio station broadcasts. When the SIRIUS radio is turned off, the vehicle's FM antenna is automatically connected back to the vehicle's AM/FM radio. The adapter connects directly in-line with the vehicle's existing AM/FM antenna input.

The SIRIUS FM Direct Adapter is designed to work with SIRIUS Satellite plug and play radios such as SIRIUS One™, Starmate™ Replay, and InV™, and with vehicle docks for plug and play radios such as Sportster™, Starmate 3, Starmate 4, S50™, Stratus™, and Stiletto™.

SIRIUS suggests professional installation of this product in your vehicle. Ask your SIRIUS retailer if they provide professional installation services, or can recommend a professional installation service.

Installation

Considerations

Certain vehicle models will require adapters to connect the vehicle's AM/FM antenna to the FM Direct Adapter, and to connect the FM Direct Adapter to the vehicle's AM/FM radio. Your SIRIUS retailer may sell these adapters, or a professional installer may be able to provide them.

Vehicle Installation

To install the FM Direct Adapter in your vehicle, refer to Figures 1 & 2 and follow these steps:

1. Remove the vehicle's AM/FM radio from the dash and disconnect the vehicle's AM/FM antenna cable from the rear of the radio.
2. Plug the FM antenna cable from the FM Direct Adapter into the same connector on vehicle's AM/FM radio. (An additional adapter may be required.)
3. Plug the vehicle's AM/FM antenna cable (which was disconnected from the vehicle's AM/FM radio) into the FM antenna socket of the FM Direct Adapter. (An additional adapter may be required.)
4. Plug the mini-connector of the FM Direct Adapter into the **FM OUT** connection on your SIRIUS radio (for radios without a vehicle dock), or into the **FM OUT** connection on your SIRIUS vehicle dock (for radios with a vehicle dock).
5. Choose a channel on the FM band of the vehicle's AM/FM radio that has little or no reception from a local FM station. You can consult the SIRIUS website at <http://www.sirius.com/fmchannel> for more information on finding a clear FM channel in your area.
6. Choose the same channel from the FM Frequency menu of your SIRIUS radio. (Refer to the user guide of your SIRIUS radio for more details.)

If the installation is successful, you should hear the SIRIUS broadcasts through the vehicle's AM/FM radio.
